

★ FEATURED COMMUNITY EVENT

Copilot Studio Saturdays

A free, monthly online meetup for the Copilot Studio community. Different Saturday each month — meet CoPi and dive in.

1 Three ways to pay for Copilot Studio

CREDIT PACK · MCS LICENSE

Copilot Studio Subscription

\$200 / pack / mo · billed annually

1 pack = 25,000 Copilot Credits, pooled at the tenant. Buy as many packs as you need each month.

- Predictable cost — best for steady, known workloads
- Unused credits do *not* roll over month-to-month
- Makers get a **free Copilot Studio user license** (see §3)

PAY-AS-YOU-GO METER

Postpaid via Azure subscription

\$0.01 / Copilot Credit · billed in arrears

No upfront commitment. Link an Azure subscription & billing policy in PPAC; pay only for what your agents consume.

- Best for unpredictable, spiky, or seasonal usage
- No service denial from overages — keeps things running
- Makers need **Copilot Studio Author role** (see §2)

INCLUDED USAGE

If your users have M365 Copilot...

\$0 to use agents your team built
Employee-facing (B2E) usage of Copilot Studio agents in Teams, SharePoint & M365 Copilot Chat is **included**. Subject to fair-use limits.

- Agent must run as the authenticated M365 Copilot user
- Classic answers · generative answers · graph grounding all \$0
- External-facing agents still consume credits

All prices in USD · current as of April 2026 · subject to change by Microsoft

2 Granting maker access — depends on how you pay

If you're using PAYG only **AUTHOR ROLE**

You must enable the **Copilot Studio Authors** setting and assign a security group. Only members of that group can build agents.

1. admin.powerplatform.com → Manage → Tenant settings → **Copilot Studio Authors** → assign (or create) a Security Group
2. admin.microsoft.com → Active Users → pick user → **Groups** → assign that Security Group → Save

If you have a Credit Pack **FREE USER LICENSE**

Each maker needs the **Copilot Studio user license** (\$0). Acquire the tenant Credit Pack and these user licenses in one transaction to streamline onboarding.

1. admin.microsoft.com → Billing → Purchase services → add the free **Copilot Studio user license** (qty = number of makers)
2. Active Users → select user → **Licenses & apps** → check **Copilot Studio** → Save

3 What costs what — Copilot Credit billing rates

AGENT FEATURE	CREDITS	M365 COPILOT	AGENT FEATURE	CREDITS	M365 COPILOT
Classic answer	1	FREE	Text & gen-AI tools — basic (per 10)	1	FREE
Generative answer	2	FREE	Text & gen-AI tools — standard (per 10)	15	FREE
Agent action (triggers, deep reasoning)	5	FREE	Text & gen-AI tools — premium (per 10)	100	FREE
Tenant graph grounding (per response)	10	FREE	Content processing tools (per page)	8	FREE
Agent flow actions (per 100 actions)	13	FREE	<i>Reasoning models add premium rate (100 / 10 responses) on top of the feature rate.</i>		

Quick math: a tenant-graph-grounded generative answer = 10 + 2 = **12 credits** ≈ **\$0.12** on PAYG, or 1/2,083 of a Credit Pack. Forecast before you ship → microsoft.github.io/copilot-studio-estimator

4 When you run out of credits

Three options when your Credit Pack is exhausted

(a) Buy more Credit Packs — additional \$200 packs stack on the tenant. **(b)** Roll to PAYG — link an Azure subscription so overage is billed at \$0.01/credit instead of being denied. **(c)** Reallocate capacity between environments in PPAC. *Heads up:* at 125% of prepaid capacity, custom agents are auto-disabled until capacity is increased — PAYG environments are **not** affected.

More bulk-purchase options (Copilot Credit Pre-Purchase Plan tiers up to 3M CCCUs at 20% off, Microsoft Agent Pre-Purchase Plan) are detailed in the **Microsoft Copilot Studio Licensing Guide** — download the current copy from the Copilot Studio licensing overview link in §5.
