How much does Copilot Studio actually cost?

A visual guide to the three ways you'll pay for Copilot Studio agents — and how to pick the right one for your team.

● APRIL 2026 · PRICES IN USD · 8-SLIDE GUIDE

SWIPE

1

You don't pay to build agents.
You pay to *publish* them.

Designing, testing, and iterating on agents in Copilot Studio is free. The cost only kicks in when you push them live to real users on a channel — Teams, M365 Copilot, your website, anywhere.

● **FREE**

Build & test

- Author topics, flows, AI tools
- Connect knowledge sources
- Test in the side panel
- Iterate as much as you want

- COSTS \$

Publish to a channel

- Push live to Teams, M365 Copilot
- Embed on website / SharePoint
- Each conversation burns credits
- Requires a license or PAYG

BONUS Want to test publishing? Start a Copilot Studio viral trial.

Self-serve signup grants a one-time **30-day trial license** (extendable by 30 more days). The trial lets you **build & test** only — you still can't publish without a paid path. Built agents keep working for up to 90 days after expiry.

2 THE THREE PATHS

Pick how you pay

Every Copilot Studio agent runs on **Copilot Credits**. There are three ways to source them — and one of them might already be free for you.

CREDIT PACK

Subscription pack at a fixed monthly rate

\$200

per pack / month · billed annually

- **25,000 credits** per pack
- Pooled at the tenant level
- Predictable cost
- *Doesn't roll over*

PAY-AS-YOU-GO

Postpaid via your Azure subscription

\$0.01

per credit · billed in arrears

- No upfront commitment
- Great for spiky usage
- No service denial
- Auto-handles overages

M365 COPILOT

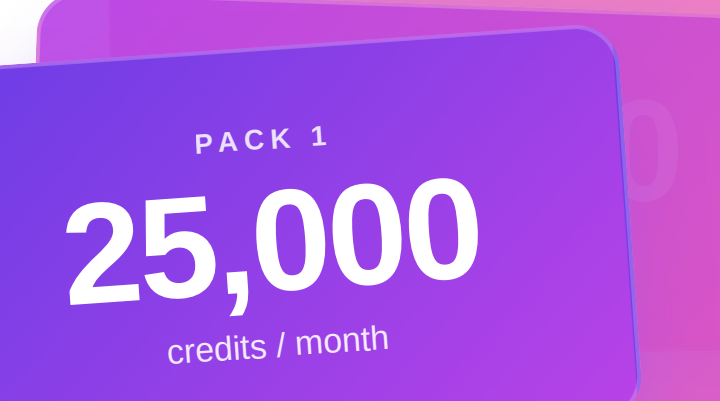

Built-in for Microsoft 365 Copilot users

\$0

to use agents your team builds

- Internal (B2E) agents
- Teams · SharePoint · M365
- Subject to fair-use limits
- External agents = credits

One pack = 25,000 credits

PACK 1

25,000

credits / month

Three packs = 75,000 credits/month for \$600/month. Need more? Microsoft offers Pre-Purchase Plans up to **3M credits annually at 20% off**.

\$200 = **25K** = **\$0.008**
PER PACK CREDITS PER CREDIT

4CREDIT CONSUMPTION

What does each action cost?

Different agent actions consume different amounts of credits. Here's the relative weight of the most common ones.

Credits per action

Indexed against the heaviest line item — premium AI tools at 100 credits per 10 calls

Classic answer Standard topic response	1	\$0.01
Generative answer LLM-generated reply	2	\$0.02
Agent action Triggers, deep reasoning	5	\$0.05
Tenant graph grounding Per response	10	\$0.10
Agent flow actions Per 100 actions	13	\$0.13
Premium AI tools Per 10 calls	100	\$1.00

Heads up: if your agent uses Microsoft 365 Copilot Chat for a licensed user — all of these line up to \$0. The B2E entitlement handles the consumption (within fair-use).

A real-world example

Here's what a typical, knowledge-grounded agent response actually costs you in Copilot Credits and dollars on PAYG.

A TYPICAL QUERY

12 credits

A **tenant-graph-grounded generative answer** = 10 (graph) + 2 (gen) credits.

IN DOLLAR TERMS

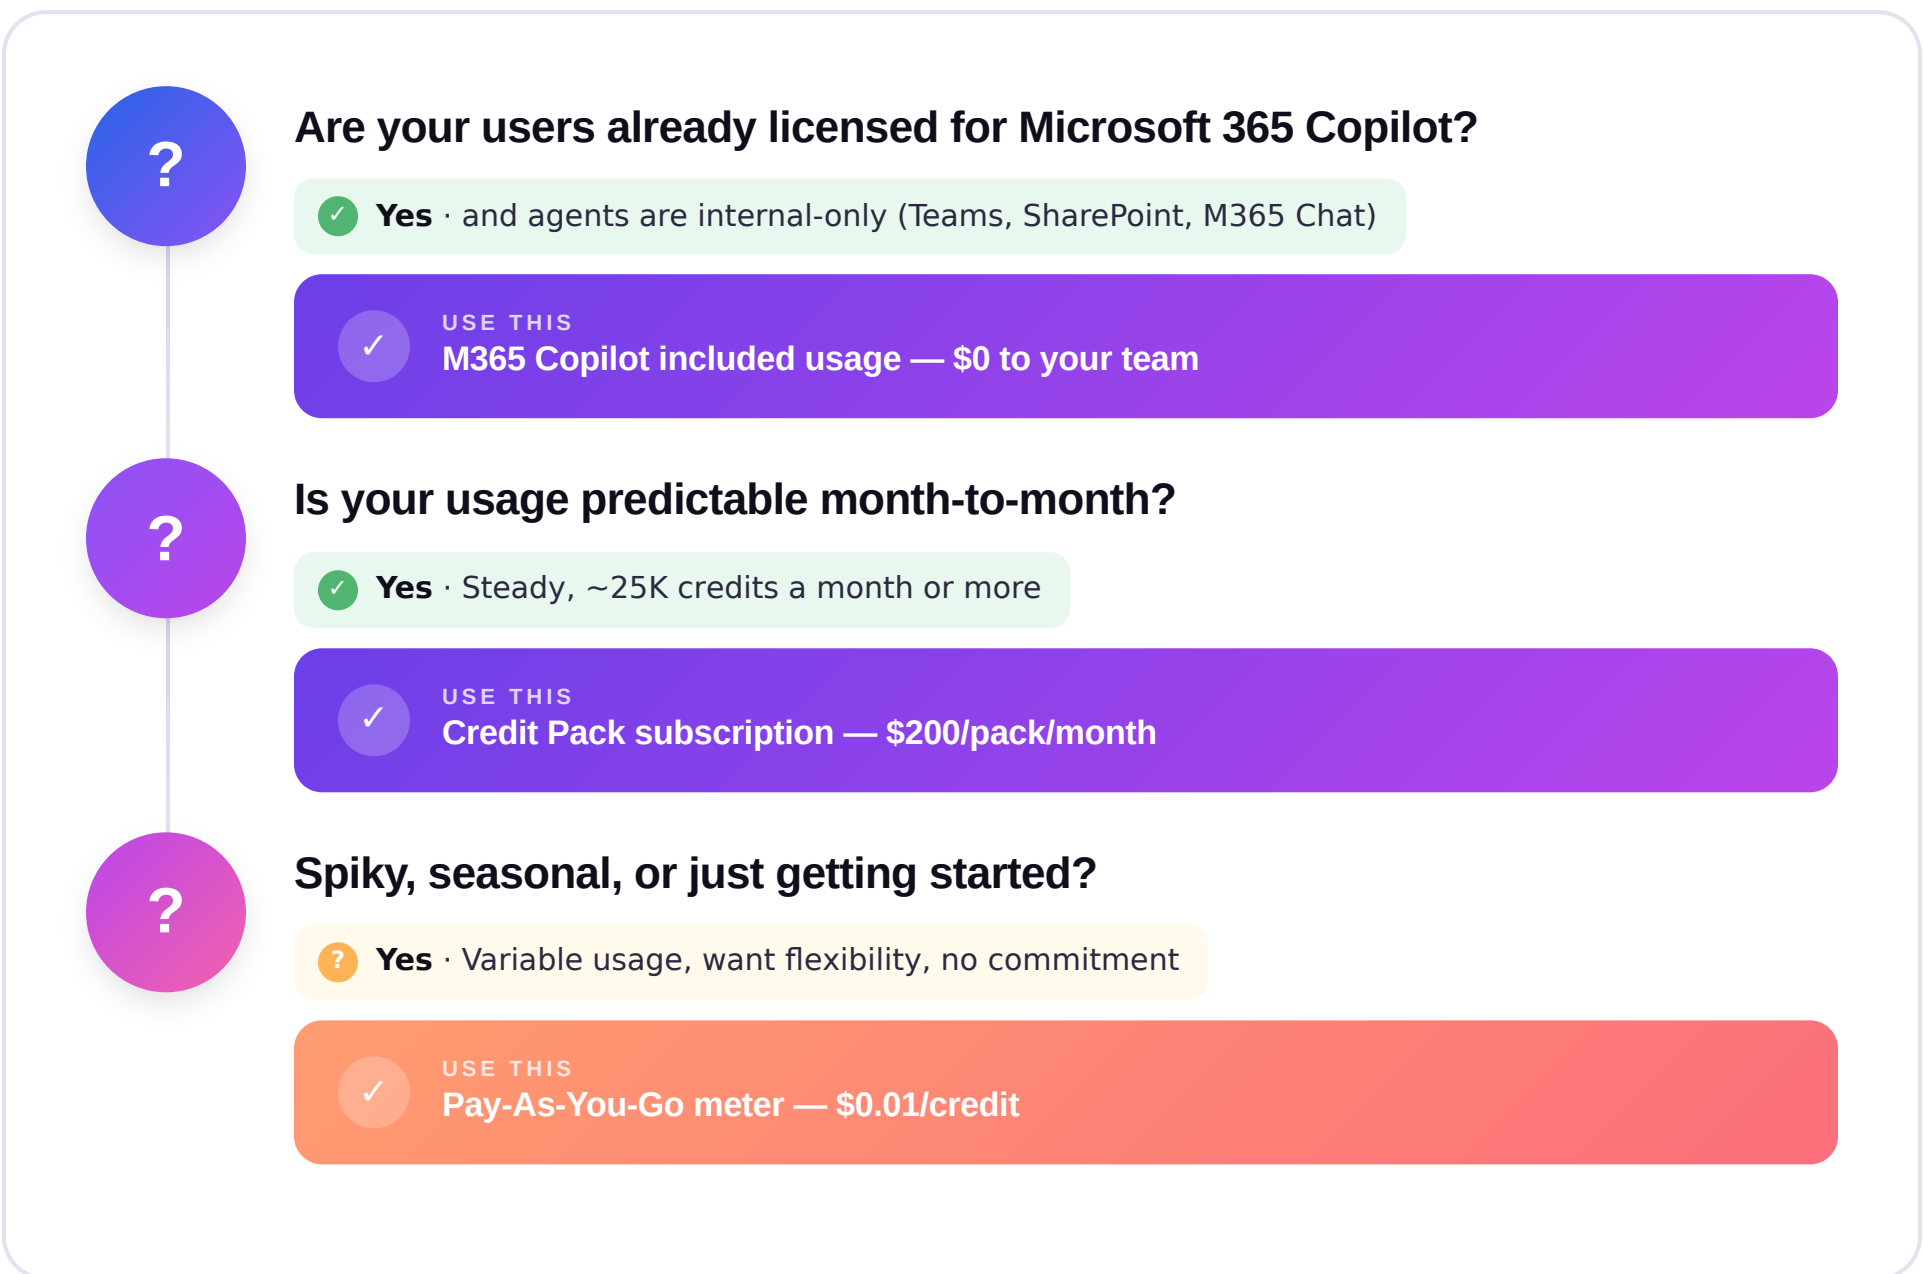

\$0.12

...on PAYG. Or roughly **1/2,083rd** of a single Credit Pack.

5

A 60-second decision tree

Answer two questions and you'll land on the right billing model for your team.

★ BEFORE YOU SHIP

Forecast your agent's cost.

Plug your agent's expected behavior into the official Copilot Studio estimator and get a credit projection before you publish.
