1 Which Builder Do I Use?

Declarative Agents

AGENT BUILDER · IN M365 COPILOT

- Created from **M365 Copilot** with Agent Builder
- Deploys in **M365 Copilot Chat** only
- Best for **personal use**; shareable individually or org-wide
- Not centrally managed; visible in **Agent 365**
- Knowledge agent only — Files, SharePoint, OneDrive, Website. **No tools.**

Custom Agents

BUILT IN COPILOT STUDIO

- Created in **Copilot Studio**
- Deploys to M365 Copilot Chat, **Teams**, & other channels with auth options
- Built for **organizational use**
- Full orchestration, knowledge, connectors, agent flows, Dataverse
- Choose your own **model**, enhanced instructions, multi-agents, autonomous agents

2 PAYG Setup: The Copilot Studio Author Role

Using Pay-As-You-Go billing exclusively?

AS OF APRIL 2026

If your tenant uses PAYG billing for Copilot Studio (no message capacity), you must also assign the **Copilot Studio Author** role to anyone who'll be building agents. Two-portal process:

1. Open **Power Platform Admin Center** → admin.powerplatform.com
2. Manage → Tenant Settings → **Copilot Studio Authors** → choose or create a Security Group; assign it to this role
3. Open **M365 Admin Center** → admin.microsoft.com
4. Active Users → select the user → Groups → assign that Security Group → Save

3 Learn & Go Deeper

Official Copilot Studio Documentation

The canonical reference — start here for any "how does X work" question.
